BSV ASSOCIATION

Logo Usage Guidelines

Jan 2026

BSV Association | Logos: Usage Terms

The BSV Association logo and all associated brand elements remain the property of BSV Association.
By downloading these assets, you're welcome to use them in accordance with these guidelines. No ownership rights or broader licenses are granted. We trust you'll represent our brand well, and we reserve the right to request changes or removal if the logo is used in ways that don't align with these guidelines.

By downloading and using these logos, you agree to:

- Use the logo only in connection with BSV Association and in accordance with these guidelines
- Not modify, distort, or alter the logo in any way
- Not use the logo in a manner that implies endorsement, sponsorship, or affiliation without written permission
- Not use the logo for unlawful, harmful, or objectionable purposes
- Maintain the quality and integrity of the logo in all reproductions

BSV Association reserves the right to request removal of the logo from any material at our sole discretion.

BSV Association | Logos: Primary Logos

Our primary logo is available in both stacked and linear lock ups, in full colour (for lighter backgrounds) and white (for darker backgrounds).

Linear

Stacked

BSV Association | Logos: Secondary Logos

A black mono version of our logo is available for exceptional use cases.

Only use this logo if our primary logos present a legibility issue, or if required for a specific print execution.

Linear

Stacked

BSV Association | Logos: Our Line

Our brand line -
“Together ▶ Towards Better”
is key to our brand messaging.

A nod to our visual identity, which foregrounds the progress we want

Our ecosystem, and recognition that success will come through collaboration

Our ambition, for the technology, but also the outcomes it delivers for people, organisations and society

BSV Association | Logos: Our Line

Our line is available locked up with our logos.

Please do not attempt to construct the lockup yourself. Always use the provided file. This ensures spacing and sizing remains consistent every time.

Linear

Stacked

BSV Association | Logos: Safe Areas

The logo safe area refers to the minimum distance between the logo and any other visual or textual elements.

Our logo safe area is determined by the cap height of ”Association”.
2 times the height of this lettering should be kept as clear space.

This safe area space is applicable when the logo is used alone, and when the logo and tagline are locked up.

BSV Association | Logos: Partnership Lockups

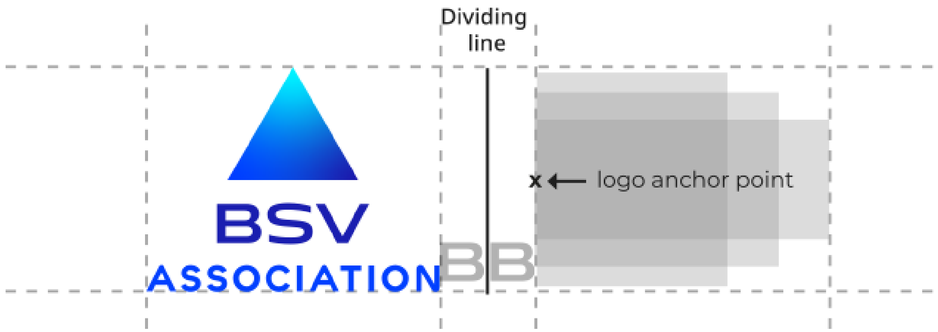

Partnership lockups should primarily use our stacked logo.

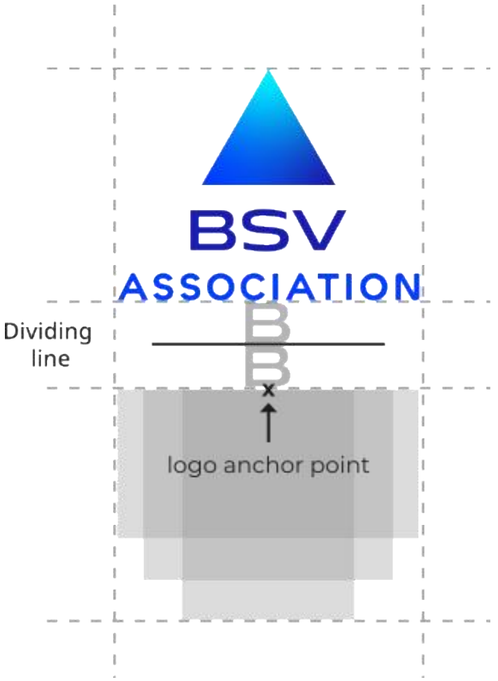

Anchor the partner logo **centred to the x,** as shown, and scale until the logo meets the boundary limit, either horizontally or vertically.

This should give the partner logo **equal prominence**. Please use your judgement to ensure this.

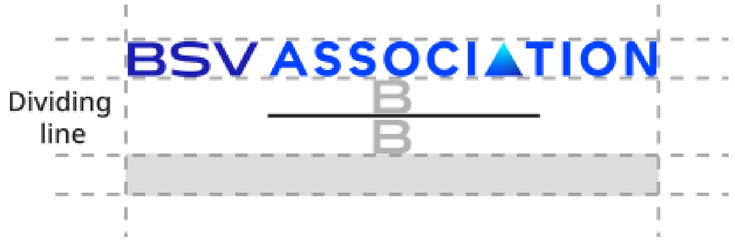

The linear logo can be used, but due to its shape, it may be harder to ensure equal prominence with a partner logo. Again, please use your best judgement as to whether it makes sense to use the linear logo.

Never use the logo & line lock up when creating a partnership lock up.

BSV Association | Logos: Do Not

DO NOT stretch, rotate or skew the logo – when resizing our logo, always scale it proportionally to maintain its integrity.

DO NOT outline – never add strokes or borders around our logo.

DO NOT recolour – our brand colours are crucial for recognition. Please use the light and dark colourways provided.

DO NOT add effects – our logo should never be seen with a drop shadow, or any other effects.

DO NOT place on busy backgrounds – to maintain clarity and legibility, our logo should appear on a simple, solid colour or a calm, contrasting area of an image.

Thank you
